Agenda:

The agenda of the meeting was to allocate the attributes of AQAR among the IQAC members for compilation of data for the year 2024-25.

Proceedings:

In the backdrop of the reshuffle in committee composition and subsequent transfers in the department, some new members were introduced into the committee while others were exonerated. Moreover the binary accreditation system introduced by the NAAC has envisaged some changes in the AQAR format which demands re-allocation of the attributes among the members for coordinated efforts by all the worth members. Now onwards there will be 10 attributes instead of 07 criteria. After threadbare discussion, the members were allocated attributes as shown against each:
